# CALLING ALL BABY SCIENTISTS!

COME PARTICIPATE!

Sign up to participate in a fun  
**in-person study** in the  
**McMaster Baby Lab!**

We are investigating whether  
**6 to 12-month-old** infants can learn to  
perceive human faces of different races  
categorically. Your child will watch as faces  
of different races appear on a computer  
screen.

**SIGN UP NOW!**

**FREE ON-SITE PARKING!**

**COME PARTICIPATE!**

Sign up to participate in a fun **in-person**  
**study** in the **McMaster Baby Lab!**

We're investigating the role of emotional vocal  
sounds on **2 - 14 month-old** infants' visual  
preferences and face processing. Your child  
will see various face images that will be  
accompanied by either emotional vocal  
sounds or neutral, non-native speech sounds  
on a computer screen.
